## MYSORE DEPARTMENT OF HEALTH.

NOTE ON THE STATE OF PUBLIC HEALTH IN MYSORE FOR THE WEEK ENDING THURSDAY THE 31ST JULY 1930.

A total of 45 attacks with 35 deaths from plague was returned during the week against 30 attacks with 32 deaths in the previous week. Mysore, Shimoga, and Chitaldrug Districts were affected. The Cities of Mysore and Bangalore and the Kolar Gold Field area remained free from the disease.

2. Comparative figures for the corresponding week for the State were 107 attacks with 65 deaths in 1929 and 13 attacks with 3 deaths in 1928.

3. A total of 5 attacks with 1 death from small-pox was returned for Hole-Narsipur and Bhadravathi Towns.

4. Ten attacks with 5 deaths from cholera were returned for one village in Sidlaghatta Taluk.

5. The total mortality for Bangalore City amounted to 86, representing a calculated annual ratio of 37·71 per mille of population against the average ratio of 29·82 for the corresponding week of last year. Classified according to causes, the deaths numbered 7 under broncho-pneumonia, 9 under pneumonia, 2 under other fevers, 3 under phthisis, 11 under dysentery and diarrhœa, and 54 under all other causes.

6. As compared with the City, the Civil and Military Station returned 73 deaths for the week ending 26th July 1930, representing a calculated annual ratio of 32·02 per mille of population against the average ratio of 21·50 for the corresponding week of last year. Classified according to causes the deaths were malaria 1, other fevers 5, dysentery and diarrhœa 7, broncho-pneumonia 7, pneumonia 5 and all other causes 48.

7. The total mortality for Mysore City for the week was 64, representing a calculated annual ratio of 39·66 per mille of population against the average ratio of 29·11 for the corresponding week of last year. The causes of deaths were malaria 5, broncho-pneumonia pneumonia 3, other fevers 4, phthisis 1, dysentery and diarrhœa 10, and all other causes 38.

8. There were 50 deaths from all causes reported from the Kolar Gold Fields area equivalent to a calculated annual ratio of 29·65 per mille of population against the average ratio of 24·90 for the corresponding week of last year. The causes of deaths were malaria 1, other fevers 4, phthisis 1, dysentery and diarrhœa 9 and all other causes 35.
